

We have been busy sorting out our web site and hopefully by now you should be able to **securely purchase products on line** using **paypal** which enables you to use all the popular credit cards.

This has meant a massive reorganisation of all our product codes; everything has to have a number!! We have attached a new price list with most of the items listed on the web site. We are now able to supply far more items and as time goes on we will put more and more useful information on the web site. If you have any suggestions we would really like to hear them.

In this newsletter we are going to report the most interesting testimonials from our customers we think you will find them useful.

## New Aura Cleanser Series 2

We have now developed a second series Aura cleanser. It is now in a Robust plastic case has no sharp edges and comes with a handle. It also has a lower height of only 55 mm so they will slip easily under a bed. The price remains unchanged.

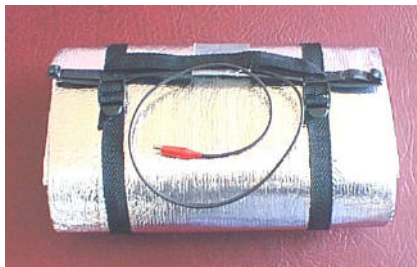

We are now supplying them with 110 volts power supplies for the USA and Canada .

## Screen for Aura cleanser

We have been asked many times to supply screens and lots of you have made suggestions. The problems with the screens are simple, firstly they need to be comfortable to lay on, resilient to being laid on and they need to be able to conduct electricity. Aluminium foil tends to break up after a while, survival blankets tend to be noisy and difficult to make a good connection to and have a tendency to tear.

We have now developed a conductive under blanket which has a polyester conductive film, it

Aura Cleanser Screen Folded  
Code 5320 cost £22.50

has a special connection to it with a lead and crocodile clip. This makes it easy to connect up to your Aura Cleanser. We would suggest you put a couple of folded blankets on it to suppress any noise the film makes and stop it getting too hot and sweaty. For the therapists who treat people in clinic, the blanket is comfortable to lay on and can be folded easily and is very portable.

Aura Cleanser Screen Open  
Code 5320 cost £22.50

# Important Advice For Aura cleanser Users

I have recently spoken to someone who has just come back from working with Lee Crock. This information did not appear in the Nexus Article

The Aura Cleanser may push the toxins out of your cells, but you really need to aid your body to remove them or you **may not notice any improvement!**

To Aid detoxification of the cells Lee Crock recommends the following to all his patients using the Aura Cleanser.

1. **You must drink a minimum of 2 litres of water per day.**

2. You should take 5 g = **5000 mg of vitamin C per day**. This should be taken throughout the day in 1 g lots, **not taken all at once**. The easiest and cheapest way to do this is by using Vitamin C crystals they can easily be dissolved in any cold drink. 1/4 teaspoon of Vitamin C crystals is 1g = 1000 mg. Code. 3300 £9.75 for 125g

3. You take the Herb **Carduus Marianus 20 drops four times per day**, in between meals. This herb is specifically recommended by Lee Crock as an effective liver cleanser .

(Herbs should usually be taken 2 hours after eating and then nothing to eat for 30 mins. In the UK they are sold as health foods and therefore the labels will always say take with food; this is the least effective way to use a herb). Code 7003 £8.00 for 50 ml

## Using the Aura Cleanser in the Bath!

OBVIOUSLY YOU MUST USE EXTREME CAUTION, MAINS ELECTRICITY AND THE BATH WOULD BE LETHAL. HOWEVER, TO BE SAFE, IF YOU LEAVE THE CONTROL UNIT OUTSIDE THE BATH ROOM AND CAN FEED A SCREEN LEAD UNDER THE DOOR. YOU MUST PLUG THE POWER SUPPLY PLUG INTO AN RCD DEVICE. (RCD is a mains cut out device).

To use the Aura Cleanser in the bath get a Stainless steel spoon, and hang the spoon so that the spoon end is in the bath and the handle sticks above the water. Connect the crocodile clip of your Aura Cleanser to the handle of the spoon. We have stuck this spoon to the bath using Duct tape. Do not put any bath products in the bath water, ie no soap or bath salts. It would be a good idea to allow at least 2, 15 mins cycles to go through, so a minimum of 30 min treatment is suggested.

## Some interesting reports from our customers.

### Kidneys Clearance?

First customer reported that they had a long term kidney problem and that they had a quick response from the aura cleanser. He noticed his urine containing strange deposit and on close examination noticed his urine contained crystals.

After a few days his long term kidney pains eased completely.

Second customer noticed that his kidney pain returned, he had passed a kidney stone in the past. The Aura Cleanser had probably started to expel more stones! After a few more nights of treatment the back pain went.

Interestingly, neither of the above customers had been using the additional advice as above. The effect of the cleansing would have been even greater.

## Colloidal Silver prevented Secondary infections?

The following letter is from one of our customers who has a chronic long term lung complaint that makes him very vulnerable to chest infections

When my wife got a bad cold recently I thought this might be an opportunity to test Colloidal silver. So I began taking Silver (5-10ppm) both by rectum (20-30ml) and by nebuliser inhalation (2ml) twice a day. In spite of this, after 4 days I began to develop the cold. I continued the treatment for the next 6 days, but without obviously aborting it - in terms of time. However, judging by the completely colourless nature of the mucus, and the lack of soreness - either in throat or lungs, I would suggest that it did inhibit the secondaries.

Rectal Delivery kit Code 6020 £2.75

My response:

I wonder if you had been infected by the virus before you commenced treatment, then the colloidal silver slowed the incubation period down as levels built in your system and then prevented secondaries. However I am really glad to hear you had a painless recovery.

Nebulisers have been the discussion of many a newsletter and those of you who have Asthma or Chronic obstructive pulmonary disease (COPD) will know what a nebuliser is. For those of you that don't it is a small device that atomises liquids into a fine smoke like mist which can be breathed in.

We are now supplying portaneb as seen in this photograph.

Nebuliser Code 5163 Cost: £65

## Colloidal Silver helps Fibroids?

This customer had bad fibroids for many years and for the last two years had suffered from severe flooding, where her haemoglobin would get down to 6.9g/dl (normal range for a woman is 10 – 12 g/dl). She had been offered a hysterectomy but did not want to have surgery.

She had decided to use colloidal silver rectally using the Rectal Delivery Kit.

Her next period was completely different no heavy flooding, very little pain. She was thrilled to get this amazing result.

The rectum would be the best way to get the blood levels of Colloidal Silver, but its close proximity to the Uterus may have some bearing on the results achieved by this customer.

By the end of May 2004 methods of taking colloidal silver should be posted on our web site [www.comsci.org.uk](http://www.comsci.org.uk) as featured in our June 2003 newsletter.

# Bob Beck claims that, based on scientific experiments, his protocol has been shown to be effective in treating systemic infections and diseases such as cancer and HIV.

## The Beck's Protocol in brief.

### 1. Microcurrent therapy for cleansing the blood:

Viruses and other pathogens had been deactivated in a medical research study by the application of microcurrents of electricity to blood. Bob Beck developed a system to apply microcurrents to blood without invading the body. He developed a simple system for applying these microcurrents by placing electrodes over the arteries.

This is our Beck's Zapper/Silver maker. It covers part 1 and 2 of the Beck's protocol.

As far as we know it is the most powerful in the world with an output of 36v.

Why so powerful?

In our own microbiological tests on yeast, moulds and bacteria, we found the higher voltage to be more effective.

The higher the voltage the faster you can make colloidal silver.

Code. 5000 Cost £97.50 (UK)

### 2. Drinking ionic/colloidal silver: See photo of our dual purpose device above.

Colloidal silver had been used extensively prior to the advent of antibiotics. Beck devised a system to make colloidal silver electronically. Ionic/colloidal silver is made using 99.99% pure silver, distilled water and electricity.

### 3. Magnetic pulsing for tissue electrification:

The blood might be cleared of viruses or other pathogens but these same pathogens could be temporarily hiding in the lymph system. To create the necessary microcurrents in lymph and tissue to neutralise viruses and other pathogens, he developed a magnetic pulse generator.

This is our own version of the Beck's Magnetic pulser. It has been designed to work more specifically with 220v European. It produces a very high single shot of magnetic energy.

Code. 5010 Cost £165 (UK)

### 4. Drinking freshly ozonated water:

Initially people using his system reported experiencing flu-like symptoms as a result of the die-off of the pathogens. The body was not able to expel the toxins fast enough. Bob always stated the importance of drinking enough water to help flush toxins but he realised adding ozone to the water would speed the detoxification

We have decided to import this Ozonator from Sota Instruments in Canada.

It is a very cost effective way of making Ozone. We could not produce a unit this good at this cost.

Code. 5030 £185 (UK)

# Freshly Ozonating Water:

Ozone is a form of oxygen—an unstable form. This instability is what makes ozone a universal cleanser. Lightning creates ozone and hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>) in our atmosphere and in our waters to help cleanse our planet.

- Ozone is widely used in Europe for purifying drinking water and swimming pools
- Ozone is also used to purify bottled waters
- Ozone is used extensively in medicine in Germany and Cuba
- Ozone is used extensively to cure diseases, that maxim is well understood
- Ozone is inexpensive especially in comparison to pharmaceuticals
- Ozone at higher levels in the atmosphere helps protect our planet
- Ozone is nature's most powerful cleanser

Oxygen is the most important healing substance, the most effective detox agent, the premium blood cleanser, the most potent antibiotic, a versatile hormone, a blood clotter and declotter, and the conductor of the orchestra of the immune system.

We need all the oxygen we can get as the amount of oxygen in the air is much reduced today. Many scientists were stunned recently when it was revealed that air bubbles trapped in fossilised amber had been analyzed and found to contain oxygen levels of 38%. Yet today it is well known that the average oxygen content of air is only 19% to 21%. In other words, since the early history of the earth, it appears there has been a whopping 50% drop in the average oxygen content of air we breathe!

Vitamins and minerals do help protect the body from harmful free radicals but it is misleading when they are referred to as 'antioxidants.' Free radical protectors would be a more accurate term—and remember excess free radicals are created by pollution not oxygen.

Dr. Majid Ali has extensive experience with oxygen therapies including ozone. He has discovered that ozone is effective as a medical therapy because it acts to protect in the same way the 'antioxidants' do. He describes this process in his latest book 'Oxygen and Ageing'.

Our bodies desperately need more oxygen. Cancer cells, for instance, can only grow in an anaerobic or oxygen-deficient environment. In 'Ozone, The Eternal Purifier of the Earth and Cleanser of All Living Beings' H.E. Sartori describes the results of live-blood analysis using phase contrast and darkfield microscopy after ozone was injected into a terminal lung cancer patient. Red blood cell membranes were strengthened; the immune system was strengthened; all pathogens including bacteria, viruses and fungi were removed. He concluded, "Ozone purifies blood by eliminating foreign materials."

The Beck Protocol includes adding ozone to a glass of cold water to increase the amount of oxygen in the water before we drink it. This is not a medical procedure. The purpose is to simply flush toxins from the system more quickly and it does it really well.

Now you can make your own **FRESHLY** ozonated water with our Ozonator £185 (code: 5030). Stored water will lose its ozone so it is always best to make it fresh and drink it straight away.

This is a report from one of our patients on the Beck's protocol. It is for information purposes only and is in no way a guide or recommendation as to what to do.

*Mr A, is a 50 year old patient, who had been suffering for several years with ME before he started to use the Beck's Protocol.*

I have been using my Beck's Zapper every day now for about 2 months. During the first month I built up the time I Zapped myself. I now Zap every day for 1 hour. I usually do this in the evening when watching TV, or before I go out (which previously I haven't done for years).

I make my Colloidal Silver the old fashioned way using tap water. The water here is pretty good, there are no Nitrates in it and I allow it to stand in an open jar for at least an hour before I use it. I put the electrodes in, connect up to my silver / zapper and run the machine for about 3 minutes. This produces a fine mist of milky colloidal silver. I usually have this about half an hour before my breakfast.

I have been using the Ozonator for the last month. It is very easy to use. Firstly it is really important to have very cold water, this will make more of the ozone stay in the water. I ozonate the water next to an open kitchen window, but it is not in direct light. I simply put the Air stone in the glass and let it bubble for 20 minutes. I do this usually half an hour after my evening meal. I feel this Ozonated water seems to be giving me even more energy, maybe it's the oxygen.

Finally, magnetic pulsing. I do not have my own magnetic pulser yet, however my therapist does and he magnetically pulses lymph nodes, in my neck particularly, but the rest of my body as well. This is usually done once per week and my lymph nodes, particularly in my neck have gone down. I hope to buy one in the near future.

Since using the Beck's protocol I have made an almost miraculous recovery. I am going out in the evening now twice per week, and am considering looking for a new job, something I would never have imagined a month ago. In the past I had tried all sorts of supplements and had quite a few therapies but nothing seemed to be of any help.

**Notes of caution from Chris:**

*Please remember this is just one person's report. Mr A can't afford to use purified water so he uses tap water.*

*The modern protocol now recommends that you use Purified or Distilled water for making both Colloidal silver and Freshly Ozonated water. However Mr A's case does illustrate that good quality tap water works as well. In 1998 and 1999 I drank a half pint of Colloidal silver made from Brighton's finest tap water every day. Brighton's water is very hard and has a high concentration of calcium ions, this would mean that the amount of Silver produced in the Colloidal Silver solution would be very high. I did this experiment on myself to prove how safe colloidal silver is. During those two year I did not have a single cold which is quite amazing considering the number of infected patients I am exposed to.*
